

STEPHEN CAREW

Middlesbrough, United Kingdom | stephen.carw@outlook.com | <https://stephencarew.dev> | (0) 7985 238426

MSc Instrumentation and Control Engineering student with hands-on experience in troubleshooting, installing, and maintaining hardware systems in industrial and IT environments. Skilled in Electrical & Automation diagnostics, and high-speed data systems. Proven ability to resolve technical issues, improve system uptime, and modernize control systems.

EDUCATION

Teesside University
MSc Instrumentation and Control Engineering

Middlesbrough, United Kingdom
Expected January 2027
Current average: 75% (Distinction)

Curtin University
BEng (Hons) Electrical and Electronics Engineering,

Perth, Australia
November 2023

WORK EXPERIENCE

University of Law
Part-time Computer Science Technician

Leeds, United Kingdom
September 2025 - Present

- Configured, maintained, and troubleshoot laboratory hardware, software, networking, and cloud systems.
- Delivered first and second-line technical support to students and academic staff.
- Developed practical cloud computing laboratories for postgraduate teaching modules
- Produced technical documentation to support laboratory operations and student onboarding.

Grindrod Terminals
Electrical & Automation Engineer Intern

Southern Africa
April 2024 - October 2024

- Installed, configured, and commissioned automation hardware systems to required specifications
- Diagnosed and repaired complex electronic hardware faults to improve system uptime
- Performed preventative and corrective maintenance on high-speed control systems
- Coordinated plant shutdown activities with contractors to modernize systems and upgrade safety

Grindrod Terminals
Electrical & Automation Engineer Intern

Southern Africa
December 2022 - March 2023

- Supported upgrades to electrical and automation systems to increase operational efficiency
- Conducted preventative and corrective maintenance, reducing unplanned stoppages
- Diagnosed and resolved faults through root cause analysis and collaboration with engineering teams

Caresoft Limited
Information Systems Technician - Hybrid

Southern Africa
January 2019 - July 2021

- Provided hardware and network support for servers, workstations and network devices
- Administered Linux and Windows systems, performing setup, troubleshooting, and optimization
- Delivered on-site and remote technical support directly to clients
- Implemented preventative maintenance to improve hardware reliability

TECHNICAL SKILLS

Hardware & Systems: Hardware installation, diagnostics, and repair; sever & network technology; high-speed serial data systems; preventative and corrective maintenance; system modernization

Operating Systems: Linux, MacOS, (Ubuntu, Kali, CentOS), Microsoft Windows Server, and Desktop

Programming, Database & Cloud: Python, Typescript, Rust, PostgreSQL, MySQL, AWS, Terraform, Node.js
