STEPHEN CAREW

Middlesbrough, United Kingdom | stephen.carw@outlook.com | https://stephencarew.dev | 07985 238426

MSc Instrumentation and Control Engineering student with hardware experience since 2019, spanning IT support at a services company, automation and electrical maintenance at a bulk-handling terminal, and current laboratory and cloud systems support at a university. CCNA-certified; comfortable diagnosing faults in Linux, Windows, and control-system environments.

EDUCATION

Teesside University — **Middlesbrough, United Kingdom**
MSc Instrumentation and Control Engineering — *Expected January 2027*
Current average: 75% (Distinction)

Curtin University — **Perth, Australia**
BEng (Hons) Electrical and Electronics Engineering, — *November 2023*

WORK EXPERIENCE

University of Law — **Leeds, United Kingdom**
Part-time Computer Science Technician — *September 2025 - Present*

- Configure, maintain, and troubleshoot laboratory hardware, software, networking, and cloud systems.
- Deliver first- and second-line technical support to students and academic staff.
- Develop practical cloud computing laboratories for postgraduate teaching modules.
- Write technical documentation for laboratory operations and student onboarding.

Grindrod Terminals — **Southern Africa**
Electrical & Automation Engineer Intern — *April 2024 - October 2024*

- Installed, configured, and commissioned automation hardware systems to specification.
- Diagnosed and repaired electronic hardware faults.
- Performed preventative and corrective maintenance on high-speed control systems.
- Coordinated contractor plant-shutdown works for system and safety upgrades.

Grindrod Terminals — **Southern Africa**
Electrical & Automation Engineer Intern — *December 2022 - March 2023*

- Supported upgrades to electrical and automation systems.
- Conducted preventative and corrective maintenance.
- Diagnosed and resolved faults with the engineering team.

Caresoft Limited — **Southern Africa**
Information Systems Technician - Hybrid — *January 2019 - July 2021*

- Provided hardware and network support for servers, workstations, and network devices.
- Administered Linux and Windows systems: setup, troubleshooting, and optimization.
- Delivered on-site and remote technical support directly to clients.
- Carried out preventative maintenance on hardware.

TECHNICAL SKILLS

Hardware & Systems: Hardware installation, diagnostics, and repair; server and network technology; high-speed serial data systems; preventative and corrective maintenance; control-system upgrades

Operating Systems: Linux, macOS, Windows Server and Desktop

Programming, Databases & Cloud: Python, TypeScript, Rust, PostgreSQL, MySQL, Node.js, AWS, Azure, Terraform

Certifications: CCNA (Cisco Certified Network Associate), Engineers Australia, Intel OpenVINO Toolkit, ViTrox Data-Driven Decision Making AIoT & V-ONE Data Analytic Perspectives, CCSx: Carbon Capture and Storage
